SUMMARY

Cybersecurity undergraduate still early in the journey but deliberate about it pursuing certifications, competing in CTFs, attending industry conferences, and building tools that solve real problems. Comfortable getting hands dirty across offensive and defensive work, and always looking to understand how things actually function under the hood. Ready to bring that same curiosity and work ethic into an internship where there is real work to be done.

EDUCATION

B.Tech in Computer Science and Engineering (Cybersecurity) — Expected 2027
St. Vincent Pallotti College of Engineering — Nagpur, Maharashtra — 8.5 CGPA

Higher Secondary School Certificate (HSSC) — Feb 2023
Vidarbha Buniyadi College — Nagpur, Maharashtra — 70%

Secondary School Certificate (SSC) — 2021
St. Vincent High School — Nagpur, Maharashtra — 92%

SKILLS

Cybersecurity	Vulnerability Assessment, Penetration Testing, Log Analysis, OWASP Top 10, SOC L1, Incident Response, Threat Analysis, SIEM
Networking	TCP/IP Fundamentals, Network Security, Traffic Analysis, IDS/IPS Fundamentals, Network Protocol Analysis
Tools & Platforms	Linux (Kali, Parrot OS), Wireshark, Burp Suite, OWASP ZAP, Metasploit, Nmap, Nessus, Wazuh, Git & Github
Technical Skills	Python, C, Java (Learning), Web Technologies (HTML, CSS, JavaScript), SQL, Bash Scripting
Soft Skills	Problem Solving, Analytical Thinking, Team Collaboration, Adaptable

EXPERIENCE

Cybersecurity Intern — ShadowFox & Redynox — Jun – Aug 2025

- Exploited 10+ vulnerabilities across Metasploitable 2 and TryHackMe lab environments using Metasploit, Wireshark, and custom wordlists, executing privilege escalation and Wi-Fi attack workflows.
- Assessed 3+ web applications against OWASP Top 10 using Burp Suite and Nessus, uncovering 8+ injection, authentication, and misconfiguration findings with CVSS-referenced severity ratings.
- Conducted 5+ network security assessments with Nmap and Wireshark; delivered structured vulnerability reports with prioritized remediation steps, improving threat visibility across assessed systems.

PROJECTS

Portable Log Analysis Tool for Isolated Networks (GitHub). Engineered a USB-deployable offline forensic tool for log analysis in air-gapped environments, enabling incident investigation across 3+ simulated isolated systems without network connectivity. Prioritized portability, forensic integrity, and tamper-resistant log handling for restricted operational settings. Selected among Top 8 teams in the Smart India Hackathon internal round; awarded 2nd Prize at the Engineers Day Project Showcase.

StoryShip – IP Leak Defense System (GitHub). Architected a content-integrity platform tracking creative asset versions via cryptographic hashing and IPFS, maintaining a verifiable, tamper-evident audit trail of drafts.

Implemented automated similarity-detection checks to identify potential IP leaks across 3+ contributor workflows, reducing manual review overhead by eliminating redundant cross-version comparisons.

CERTIFICATIONS & ACHIEVEMENTS

Certified API Security Analyst (CASA) – APISec University — Apr 2026
Certified in Cybersecurity (CC) – ISC2 — May 2025
Cryptography and Network Security – NPTEL — Apr 2025
Geo-data Sharing and Cybersecurity – ISRO IIRS Outreach Program — Dec 2024

Smart India Hackathon – 2nd Prize, Engineers Day Project Showcase — Oct 2025
International Cyber Summit (ICYS) – 3rd Place, CTF — Oct 2025

EXTRA-CURRICULAR ACTIVITIES

- **Seasides Information Security Conference 2K26** – Attendee, Goa - Workshops covered exploit writing, AI agent and MCP server hacking, AD red teaming, and hardware security (Bluetooth, RF cloning, ATtiny85 badge).
- **EncipherX 4.0** – Android Challenge Lead & Media Head - Architected Java-based Android exploitation challenges, drove end-to-end media operations, and contributed to organizing a 24-hour national CTF that drew 150+ competing teams.
- **Web3 Hackathon 2025** – Spearheaded digital outreach across social media and college networks, conducted a foundational blockchain workshop, and coordinated event logistics for a sustainability-themed hackathon, driving 100+ participant turnout.
- Technical Member, Phoenix Cybersecurity Forum.
- Solved 20+ machines on VulnHub; actively practicing on TryHackMe and HackTheBox across web exploitation, privilege escalation, and network forensics challenges.
- Active participant in cybersecurity CTFs, hackathons, and hands-on offensive/defensive labs.
