SUMMARY

Computer Science undergraduate with a track record of building and shipping software across web, systems, and Android domains. Recognized at Smart India Hackathon for engineering a real-world forensic tool. Brings a security-aware development mindset – understanding how systems break informs how they are built better. Seeking software engineering roles where strong problem-solving and a habit of building things from scratch translate into real impact.

EDUCATION

B.Tech in Computer Science and Engineering (Cybersecurity) — Expected 2027
St. Vincent Pallotti College of Engineering — Nagpur, Maharashtra — 8.5 CGPA

Higher Secondary School Certificate (HSSC) — Feb 2023
Vidarbha Buniyadi College — Nagpur, Maharashtra — 70%

Secondary School Certificate (SSC) — 2021
St. Vincent High School — Nagpur, Maharashtra — 92%

SKILLS

Technical Skills	Python, C, Java (Learning), SQL, Bash Scripting
Web & Mobile	Web Technologies (HTML, CSS, JavaScript), Android Studio, Java (Android)
Tools & Platforms	Git, Linux (Kali, Parrot OS), VS Code, Android Studio, SQLite, IPFS, Wireshark, FastAPI
Concepts	Data Structures, OOP, CRUD Design, Cryptographic Hashing, Secure Coding, OWASP Top 10, Network Security Fundamentals
Soft Skills	Problem Solving, Analytical Thinking, Team Collaboration, Adaptable

EXPERIENCE

Cybersecurity Intern — ShadowFox & Redynox — Jun – Aug 2025

- Scripted and automated vulnerability scanning workflows across 3+ target environments using Python and Bash, reducing manual assessment overhead and improving test repeatability.
- Analyzed 3+ web applications for security flaws, documented 8+ findings with severity ratings, and produced structured remediation reports delivered to review teams.
- Conducted 5+ network assessments using Nmap and Wireshark; synthesized results into prioritized technical reports with actionable mitigation steps.

PROJECTS

Portable Log Analysis Tool (GitHub). Built a Python-based CLI tool deployable via USB for log parsing and forensic analysis across isolated systems without network access. Designed modular architecture for portability and extensibility across 3+ simulated environments. Selected among Top 8 teams in the Smart India Hackathon internal round; awarded 2nd Prize at the Engineers Day Project Showcase.

RxRewards – Medical Store Loyalty System (GitHub). Developed a full-stack admin web platform using Python, Flask, and SQLite for managing pharmacy customers, products, purchases, and loyalty discounts. Implemented normalized database schema, CRUD workflows, and a centralized dashboard for operational visibility across product and customer data.

StoryShip – IP Leak Defense System (GitHub). Designed a backend content-integrity platform tracking asset versions via cryptographic hashing and IPFS, maintaining a tamper-evident audit trail across 3+ contributor

workflows. Implemented automated similarity-detection to flag potential duplicate or leaked content, reducing manual cross-version review overhead.

CERTIFICATIONS & ACHIEVEMENTS

Certified API Security Analyst (CASA) – APISec University — Apr 2026
Certified in Cybersecurity (CC) – ISC2 — May 2025
Cryptography and Network Security – NPTEL — Apr 2025
Geo-data Sharing and Cybersecurity – ISRO IIRS Outreach Program — Dec 2024

Smart India Hackathon – 2nd Prize, Engineers Day Project Showcase — Oct 2025
International Cyber Summit (ICYS) – 3rd Place, CTF — Oct 2025

EXTRA-CURRICULAR ACTIVITIES

- **EncipherX 4.0** – Android Challenge Lead & Media Head - Architected Java-based Android exploitation challenges, drove end-to-end media operations, and contributed to organizing a 24-hour national CTF that drew 150+ competing teams.
- **Web3 Hackathon 2025** – Spearheaded digital outreach across social media and college networks, conducted a foundational blockchain workshop, and coordinated event logistics for a sustainability-themed hackathon, driving 100+ participant turnout.
- **Seasides Information Security Conference 2K26** — Attendee, Goa - Attended sessions on AI agent security, hardware hacking, and enterprise system attack simulation.
- Technical Member, Phoenix Cybersecurity Forum.
- Active participant in hackathons, coding challenges, and hands-on software and security labs.
